### DETAILED ACTION

1. Claims 13-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 2828

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1, 3, 4, 6 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ackerman et al (5,022,930) in view of applicants' acknowledged prior art 1, as set forth in the specification on page 5 lines 14-24, where the inclusion of low heat conduction gas is taught to be conventional.

In Figures 2 and 4, Ackerman et al teach a hermetically sealed package that has a vent member (72) extending from the interior space to the exterior of the package, wherein, when unsealed, said vent member being configured to transport a gas between the interior space and the exterior, and when sealed, said vent member being configured to prevent a flow of gas between the interior space and the exterior.

At the time of the invention it would have been obvious for one of ordinary skill in the art to modify the package structure of the acknowledged prior art to include a vent member as is taught by Ackerman et al. The modification of the acknowledged prior art to include the conduit (71) of Ackerman would allow for the entry or egress of gas which purges the spacing and allow for easy sealing as is taught by Ackerman in col. 10 lines 1-5.

6. Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ackerman et al (5,022,930) in view of applicants' acknowledged prior art 1 as applied to claim 1 and further in view of the following. Preferred configuration of the vent member would have been within the ambit of ordinary skill in the art.

Art Unit: 2828

7. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ackerman et al (5,022,930) in view of applicants' acknowledged prior art 1 as applied to claim 1 and further in view of the following. Selection of conventional gas introduction devices and operation of the devices in a preferred sequence would have been in the ambit of ordinary skill in the art at the time of the invention. No unexpected results are seen to accrue.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James W Davie whose telephone number is (703) 308-4847. The examiner can normally be reached on M-F 9-5:30.
